REMARKS

Claims 29-41 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of U.S. Patent No. 6,863,446 B2. Attached is a terminal disclaimer and a check for the terminal disclaimer fee. The examiner is requested to reconsider this rejection.

Claims 29, 31-33, 35 and 38-39 were rejected under 35 U.S.C. §103(a) as being unpatentable over Beard et al. (US 5,317,663) in view of Estrella et al. (US 6,695,485 B1). Claims 36, 37 41 were rejected under 35 U.S.C. §103(a) as unpatentable over Beard et al. (US 5,317,663) in view of Estrella et al. (US 6,695,485 B1) and Ernst et al. Claims 34 and 40 were rejected under 35 U.S.C. 5,825,955). §103(a) as being unpatentable over Beard et al. (US 5,317,663) in view of Estrella et al. (US 6,695,485 B1) and Szilagyi et The examiner is requested to al. (US 6,305,961 B1). reconsider these rejections.

Claim 29 has been amended above to clarify applicant's claimed invention. In particular, claim 29 claims that the latch inserts are separately connected to the housing. In Beard et al. the inner housing halves 410, 420 are captured in grooves 238, 239 by their flanges 450. There is no disclosure or suggestion in Beard et al. of the first inner housing half 410 and the second inner housing half 420 being separately connected to the main body 205. Claim 29 on the other hand claims that the latch inserts are separately connected to the

housing. The other art of record does nothing to cure the deficiencies of Beard et al. Therefore, claim 29 is patentable and should be allowed.

Though dependent claims 30-38 contain their own allowable subject matter, these claims should at least be allowable due to their dependence from allowable claim 29. However, to expedite prosecution at this time, no further comment will be made.

Claim 39 has been amended above to clarify applicants' claimed In particular, claim 39 claims that the pair of invention. inner adapter housings are separately spring latch connected to the outer adapter housing proximate opposite ends of the As noted above, in Beard et al. the inner housing halves 410, 420 are captured in grooves 238, 239 by their flanges 450. There is no disclosure or suggestion in Beard et al. of the two inner housing halves 410, 420 being separately spring latch connected to the outer adapter housing proximate opposite ends of the passage of the main body 205. Claim 39 on the other hand claims that the pair of inner adapter housings are separately spring latch connected to the outer adapter housing proximate opposite ends of the passage. other art of record does nothing to cure the deficiencies of Therefore, claim 39 is patentable and should be Beard et al. allowed.

Though dependent claims 40-41 contain their own allowable subject matter, these claims should at least be allowable due to their dependence from allowable claim 39. However, to

expedite prosecution at this time, no further comment will be made.

Claims 44-45 have been added above to claim the features recited therein.

For all of the foregoing reasons, it is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record. Accordingly, favorable reconsideration and allowance respectfully requested. Should any unresolved issue remain, the Examiner is invited to call applicant's Attorney at the telephone number indicated below.

Respectfully submitted,

Mark K. Harring Mark F. Harrington (Reg. No. 31,686)
